

The CTRs or "Contrari"/Opposites" (vs) The W-56s

The CTRs mean "something that has been built". They are the result of a biological experiment that went terribly astray, somewhere within the stars of Orion's belt. the designer of the experiment died in his effort to stop the experiment. The W-56 have mastered biology, to them it is quite easy to build biological robots, that is living entities, at times totally identical to normal persons. But they are, anyway, still robots, that is to say entities without a self-consciousness: they behave according to some general principles, are able to take initiatives, but remain just machines, without an ego, without a soul, without a higher self. (*That is without Atma, Budda and Upper Manas- see chart below*)

Long ago, a scientist tried to overcome this Biological Limitation. He thought he could create a soul (*the Atma, Budda and Upper Manas Principles*) from pure biological material. The first result of his experiment was his biological robots revolted against him, killing him. After his death his biological robots started to reproduce by way of human sex and a new race appeared. The CTRs have evolved beyond their original biological robots design. They have a powerful minds and wills but no emotions. From the "Lower Manas" they have received the ability to will. They no longer depend on outside instructions. They no longer accept commands and are totally autonomous. Because they are an artificial race and only possess the lower 3.5 principles (*Lower Manas, Etheric Physical and Solid Physical bodies*) they are not able to understand the (*Atma, Budda and Upper Manas*) ego/soul/higher self aspect. That is they have no divine spark or god self. Since they have "no souls" to reincarnate into there Cloned children, "knowledge and memory" is passed down to their children by way of cloning of genetic material. Because they lack a soul they have chosen scientific knowledge as their divine spark.

On the other hand, the W-56, like earth humans and other ET civilizations, have a *ego/soul/higher self aspect* which reincarnates into the fetus. Hence, they are generated within the "natural global design of the universe".The CTRs, for all they powerful scientific knowledge do not have the ability to understand "spirit". However they are aware of this Lack of Spirit and they are going mad trying to understand this thing we call "**spirit**". They have been at this for millions of years. Emotions are a concept totally foreign to the CTR's mentality. They have no need to abduct humans which is a preposterous notion to them because they have mastered biology million of years ago. They use psychological warfare in order to analyze the emotional level of bystanders. Death, stress and torture are the main tools used to gain emotion responses. They are truly a amoral race of ETs. Generally speaking, the CTRs are a Nazi-like: very cold, devoid of any human feelings, living inside a strong hierarchical structure. Their biological knowledge is astonishing, although in those areas they sit well behind their creator race the W-56. The best and only weapons earth humans have is our will power. They will seek to induce suicide and murder unless met with a fierceness of will.

UPON DEATH

Revised 2022

The 7 Human Principles in Man

Positive

The Region Of Devachan

Atma (or divine spark. 3 permanent atoms.)

Budda (Soul. This is the shell for the spark)

Manas. (The Higher Mind. The Higher Emotions. The Higher Pranas or Life force)

Negative

The Region of Avichi

Recycled by Nature

Manas. (The Lower Mind. The Lower Emotions. The Lower Pranas or Life Force.)

Etheric Physical (or Magnetism Body That Holds the Solid Physical Together)

Solid Physical Body (or the Shula Sarira)

Before and After Rules

Before death: the Astral is made up of higher & lower mind. The higher and lower emotions The higher and lower life force

After death: the Astral is made up of the lower mind. The Lower Emotions. The Lower life force.

Occult Math .5 and .5 equals the 4th principle

1.)Atma

2.)Budda

3.)Manas

The 4th

.5 Upper Principles

.5 Lower Principles

5.)Manas

6.)Etheric Physical

7.)Solid Physical

Note: Semyon Kirlian was able to photograph human auras or "Prana energy" which is not heat, electricity, magnetism or kinetic. Prana specifically belongs only To those process that human beings call "life". For more info study the work of the Austrian Doctor Wilheim work on "Orgone Energy" Along with the work of Biologist Rupert Sheldrake on "Morphogenetic Fields". Also, Some ET Races use "Prana energy" To power their UFOs.
